Global Styling (Polished Dark Theme)

While built in Streamlit, the design aims for a modern, component-based feel using Streamlit's native Theming API or custom CSS (for minor padding/border-radius tweaks).

- **Theme:** Modern Dark Theme (Background: #0E1117, Widgets: #262730, Accent: #FF4B4B)
- **Typography:** Clean sans-serif (Streamlit's default Inter).

VIEW 1: Main Results Dashboard

(This is the default view once detection is triggered in the sidebar.)

Sidebar (Configuration & Control)

Streamlit's st.sidebar. Only absolute controls.

1. **Project Title/Logo:** (Polished image or formatted text) "SENTINEL AI: TRAFFIC DETECTION" (Academic Project V1.0)
2. **File Uploader:** st.file_uploader. Accepting *.mp4, .avi, .jpg, .png. Label: "Upload Traffic Media."
3. **Detection Toggles:** A header "Violation Settings". A single checkbox: st.checkbox("Enable Wrong-Way Detection").
4. **Trigger Button:** st.button("Run Detection", type="primary")

Main Body Area (The Dashboard)

Row 1: Top Summary Metrics (The "Value Cards")*Using st.columns(4) with stylized containers for modern look.*

Card 1 (Blue Accent)	Card 2 (Green Accent)	Card 3 (Orange Accent)	Card 4 (Red Accent)
TOTAL VIOLATIONS	**CONFIRMED**	**NEEDS REVIEW**	**PROCESSING PROGRESS**
[Big Number, e.g., 28]	[Big Number, e.g., 20]	[Big Number, e.g., 8]	[Big Number, e.g., 128/1500 Frames]
Subtext: Current Session	Subtext: High Confidence (YOLOv8)	Subtext: Low Confidence (EasyOCR/YOLOv8)	Subtext: Processing Frame Count
(Icon: Car/Warning)	(Icon: Check Circle)	(Icon: Alert Circle)	(Icon: Clock/Loading)

Row 2: Live Processing & Analysis*Using st.columns([2, 1]) — larger column for video, smaller for chart.*

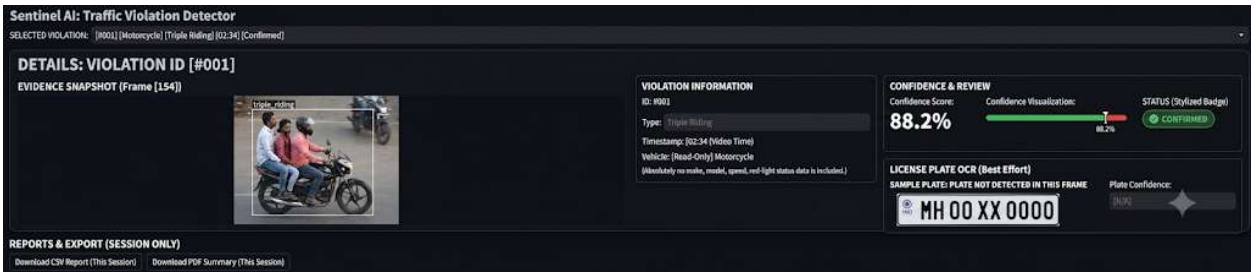

- **Left Column (2x width): Live Preview & Progress**
    - **Title:** "CURRENTLY PROCESSING: Frame [Frame#]"
    - **Live Preview Window:** (st.image updated in loop). Displaying the **CURRENT** processed frame with overlaid bounding boxes (YOLOv8 output). This is a replay of the *uploaded file*, not a live feed.
    - **Progress Bar:** Standard st.progress bar (calculated by current_frame / total_frames).
    - **Stop Button:** Standard st.button("Stop Detection") (Red style), located below the video window to end the processing loop.
- **Right Column (1x width): Violations by Type (This Session)**
    - **Title:** "SESSION BREAKDOWN"
    - **Chart:** Simple Donut Chart (e.g., using st.plotly_chart via Plotly Express, configured with dark theme).

    - **Scope:** Distribution of the **4 types ONLY**: (Helmet, Triple Riding, Illegal Parking, Wrong-Way).
    - **Constraint Note:** Chart explicitly labeled: "(Data shown for THIS session only, database clears upon exit)."

Row 3: Violation Log Table*Standard st.dataframe or st.data_editor in full width.*

- **Title:** "SESSION VIOLATION LOG"
- **Data Source:** The current, session-cleared Pandas DataFrame.
- **Columns Provided:** Violation ID (e.g., #001), Violation Type, Vehicle (car/bus/truck/motorcycle), Frame, Timestamp (time elapsed in video), Confidence (e.g., 0.92), Status.
- **Functional Polish (Custom CSS for Status Column):** The Status column is key. High confidence detections get a distinct green background cell ("Confirmed"). Low confidence gets an orange background cell ("Needs Review"). This immediately highlights the two-tier system for evaluation.

VIEW 2: Violation Detail View

(This view is accessed when a user selects a single violation ID from the log table in View 1, utilizing Streamlit's st.radio or st.selectbox for index selection below the table.)

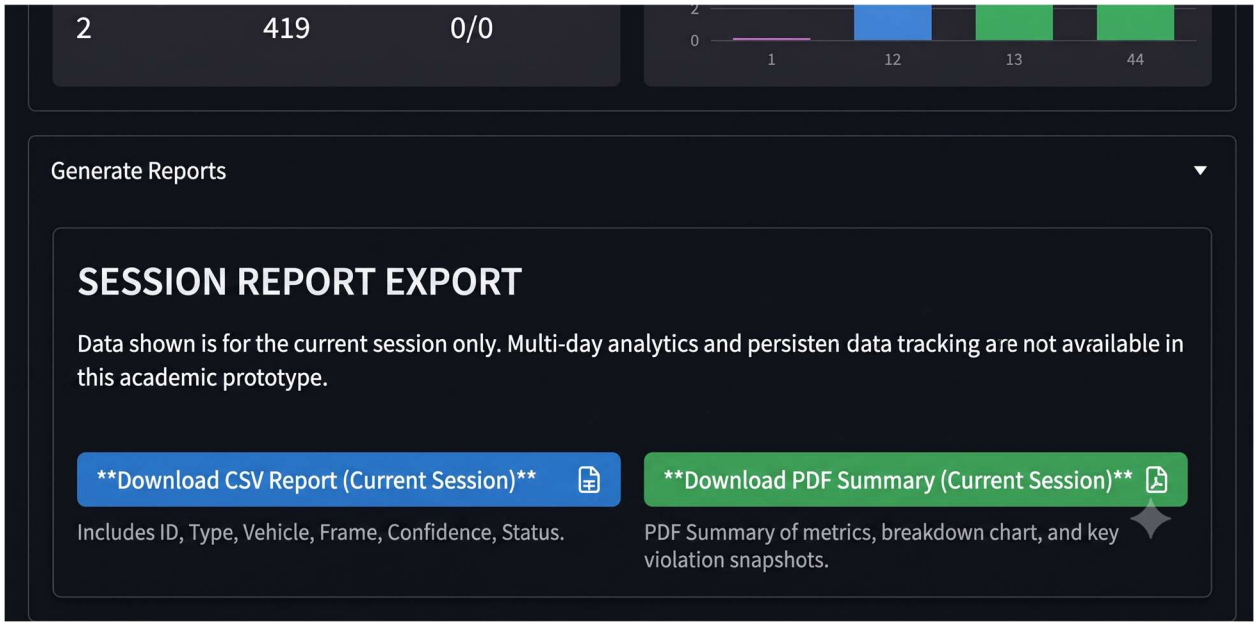

The Detail Panel Container*Title:* "DETAILS: VIOLATION ID [#001]" (With custom styling like borders or shadows for component feel).

Detail Panel Layout (st.columns([1, 1]))

- **Left Column: Evidence Image**
    - **Title:** "EVIDENCE SNAPSHOT (Frame [Frame#])"
    - **Image Window:** st.image. High-quality cropped snapshot of the **CURRENT DETECTED VEHICLE ONLY**, showing the bounding box overlay (Helmet Missing, Triple Ride, etc.).
- **Right Column: Specific Information Panels (Stacked)**
    - **Panel 1: "VIOLATION INFORMATION"**
        - ID: #001
        - Type: [Text Input Box, Read-Only] "Triple Riding"
        - Timestamp: [Read-Only] 02:34 (Video Time)
        - Vehicle: [Read-Only] Motorcycle
        - *No other data (no make, model, speed, red-light status).*
    - **Panel 2: "CONFIDENCE & REVIEW"**
        - Confidence Score: (Custom CSS component, large bold number) "88.2%"
        - Confidence visualization (e.g., a simple color bar from green to red, indicating where 88.2% falls).
        - **STATUS (Stylized Badge):** (Using st.markdown with custom CSS).

        - *If Confidence > Threshold:* GREEN "CONFIRMED" badge.
        - *If Confidence < Threshold:* ORANGE "NEEDS REVIEW" badge.
    - *Constraint Note: Absolutely no case-management buttons like "Notes", "Mark as Resolved", "Add Watchlist". This data is static.*
- **Panel 3: "LICENSE PLATE OCR (Best Effort)"***Using st.columns(2) for aesthetic.*
    - *Case A: OCR Successful:* Display the best-effort OCR text in large bold font.
    - *Case B: OCR Unsuccessful:* Display a standard graphic placeholder (like image_6.png or image_7.png), but **CLEARLY AND VISUALLY LABELED with large Markdown text** above or overlaid: "SAMPLE PLATE: PLATE NOT DETECTED IN THIS FRAME". The plate is a visual placeholder only.
    - Plate Confidence: (If Case A, e.g., 72.1%. If Case B, N/A).

VIEW 3: Reports/Export Area

(Standard full-width Streamlit section at the bottom of View 1, often inside an st.expander named "Generate Reports.")

Report Container Panel*Title:* "SESSION REPORT EXPORT" (A clean panel component with modern styling).*Constraint Header:* "Data shown is for the current session only. Multi-day analytics and persistent data tracking are not available in this academic prototype." (Ensuring full academic transparency).

Download Panel Layout (st.columns(2))*Using standard st.download_button functionality.*

Download Button 1 (Left Column)	**Download Button 2 (Right Column)**
st.download_button(...)	**st.download_button(...)**
Button Label: "**Download CSV Report (Current Session)**"	Button Label: "**Download PDF Summary (Current Session)**"
Subtext: Includes ID, Type, Vehicle, Frame, Confidence, Status.	Subtext: PDF Summary of metrics, breakdown chart, and key violation snapshots.
(Icon: File SpreadSheet)	(Icon: File PDF)
